About Me

Passionate student of Information Science and Engineering discipline, looking forward to utilize my skills in professional learning environment and work on my interests.

Professional Skills

- C
- C++

Basics of :

- Python
- Java
- Html , Css
- SQL

Personal Skills

- Flexibale and Adaptable
- Planning and Coordination

Education Background

- **B.E, Information Science Engineering, Fourth Year (8.74 cgpa)**
  Nitte Meenakshi Institute Of Technology | Bengaluru | Karnataka
  Graduating Year 2024
- **Higher Secondary Education, PCMB (90.16 %)**
  Christ Junior College | Bengaluru | Karnataka
- **Secondary School ,SSLC (94.88 %)**
  Swamy Vivekananda English High School | Doddaballapura | Bengaluru

Languages

Kannada
English

Projects

- Voice Controlled Bumper Car

  Final project done in LEGO Mindstorms Training
  (Using touch and sound sensor)
  Team Size: Five
  The voice-controlled bumper car is a project that uses touch and sound sensors to control the movement of the car. The system can be controlled using voice commands and responds to touch and sound signals. The project provides a fun and interactive way to control a bumper car using innovative technologies.

- Online pesticides buying website

  (Using HTML, CSS, JavaScript, XML)
  Team Size: Four
  The website provides information about new pesticides and technologies in pest control on its homepage. It contains advertisements related to agriculture and crop protection. The navigation bar makes it easy to find information on specific pages, which include solutions for crop diseases, nearby stores, and guidance on proper pesticide use.

- AI-powered Lip Reading System

  (Using AI and ML with TensorFlow)
  Team Size: three
  Final Year Project: Still Learning The technologies
  A project that utilizes artificial intelligence and machine learning with TensorFlow to recognize and interpret lip movements. The system can accurately decipher spoken words by analyzing lip patterns and converting them into text. This project has the potential to enhance speech recognition technology for individuals with hearing impairments.

- "Seasonal Analysis of Amazon Forest Fires: A Data Science Approach with Pandas and Matplotlib"

  (Using pandas and matplotlib libraries)
  Team Size:2
  This project visualizes the frequency of Amazon forest fires over the months in a year using pandas and matplotlib. The data is presented in a bar plot, which highlights the months with the highest number of fires. The visualization provides a clear understanding of the seasonal patterns of the forest fires

Certification Courses

- Data science and machine learning using python

  IN PROGRESS
  (Udemy)

- Joy of computing using Python

  (Nptel)

- Java programming Fundamentals

  (Infosys Springboard)

Community Involvement

- Member at IEEE NMIT **Robotics** Student Branch
  Actively participated in **LEGO Mindstorms Training**
- Social Media Lead For Cloudzilla Club, a student-led tech club at NMIT
- Organized a technical treasure hunt event as a part of the Cloudzilla club

Achievements

- Participated in the 15th International Level Science Talent Examination in 2013 and Secured 1st class in School Level.
- Achieved second place in a science exhibition held at the school level.
- Our team was awarded the "Best Notice Board Activity" momentum during our 2nd PUC studies, and I was one of the team members.
- Participated in a fun event called MAZE RUN and won first prize at NMIT.

Declaration

I hereby declare that the information furnished above is true to the best of my knowledge.
